### The Niagara Peninsula Wine Region

The Niagara Peninsula has special climate and soil conditions that allow for the cultivation of premium wine-grape varieties. Climate is a key factor; a “Micro climate” is a small region sheltered from extreme climatic conditions which enables the grape to thrive. The Niagara region is a classic example. Here within an otherwise severe climate, exists a unique pocket of land which provides perfect conditions for grape growing. The Niagara Peninsula has the temperature-moderating influences of Lake Erie and Lake Ontario. The Niagara Escarpment acts as an ideal wind protection, sheltering the area from harsher weather conditions which the surrounding areas may receive. Rolling hills with soil comprised of sand-gravel-clay mixture provide optimal conditions, affording the vines greater sun exposure and improved natural drainage.

In 1988 Ontario introduced an appellation system known as Vintners Quality Alliance (, V.Q.A.). This alliance was designed after careful study of those of France (A.O.C.), Germany (Q.M.P.), Italy (D.O.C.), and the United States (B.A.T.F.), to help give Ontario wineries worldwide respect and quality standards. Bottles are given a seal which stipulates a general D.V.A. (Designated Viticultural Area) or a more specific D.V.A.. This designation assures that all the grapes that went into the production of the bottle of wine were in fact locally grown in Ontario.

### Wine Sugar Coding

## BY THE BOTTLE - CHAMPAGNE & SPARKLING

*" I drink it when I'm happy and when I'm sad. Sometimes I drink it when I am alone. When I have company I consider it obligatory. I trifle with it when I'm not hungry and drink it when I am. Otherwise, I never touch it - unless of course I'm thirsty."*

### ROSÉ

***Pink wine happily spans the colorspace between red and white wine, in a way, rosé is more like a state of mind.***

*Rosé happens when the skins of red grapes touch wine for only a short time. Where some red wines ferment for weeks at a time on red grape skins, rosé wines are stained red for just a few hours. The winemaker has complete control over the color of the wine, and removes the red grape skins (the source of the red pigment) when the wine reaches the perfect color. As you can imagine, nearly any red wine grape (from Cabernet Sauvignon to Syrah) can be used to make rosé wine, however there are several common styles and grapes that are preferred for rosé.*

*Savour the best of 'old world' wine in 'new world' Niagara wine country. Chef Sommelier Fred Gamula unveils an exclusive selection from Bordeaux, France - many of which are not available anywhere else in Ontario. Bordeaux is the world renowned home of the Cabernet Sauvignon grape. This grape, traditionally blended in varying proportions with Cabernet Franc, Merlot, Petit Verdot and Malbec produces robust, intense wines full of dark fruit flavours that are long and elegant on the palate and capable of aging for many years.*
